Pest Control Insulation Offers New SmartTowel™ for PMP Disinfectant Programs

Lula, GA – Understanding the state of the pest management industry in light of the current pandemic, Pest Control Insulation, makers of EPA-registered TAP® Pest Control Insulation, offer the new SmartTowel™ for use with disinfectant programs. This microfiber towel is the latest defense against the spread of soils and contaminants. With a unique and easy-to-use design, the SmartTowel™ is the ideal clean-up tool or disinfectant delivery system. “We are always on the lookout for innovative products that help our clients achieve greater success,” shares Matt Paul, chief Marketing Officer for Pest Control Insulation, “The SmartTowel helps clean and disinfect customer homes and businesses in confidence without the fear of cross-contamination.” The SmartTowel™ is just one of the products in the company’s disinfectant product line.

Since 2001, Pest Control Insulation, LLC has provided turnkey equipment packages for Pest Management Professionals and Wildlife Professionals alike as well as training and support. Dedicated to providing new revenue opportunities through innovative, environmentally responsible and highly valued pest control programs, Pest Control Insulation, LLC supports companies nationwide. PCI’s flagship product, TAP® Pest Control Insulation, is an EPA-registered, cellulose insulation bearing the Energy Star® and UL Classified marks manufactured specifically for the pest management industry. Visit TAPinsulation.com to see how Pest Control Insulation can complement your current business offerings.
